

Latihan Project Viral

- a. Apakah terjadi compile error? **Tidak terjadi compile error**

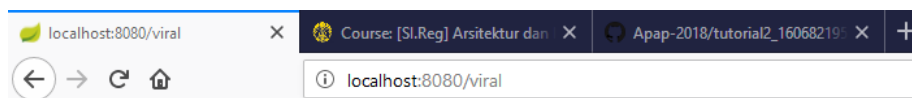

```
1 package com.example.demo.controller;
2
3 import org.springframework.stereotype.Controller;
4 import org.springframework.web.bind.annotation.RequestMapping;
5
6 @Controller
7 public class PageController {
8     @RequestMapping("/viral2jari")
9     public String index() {
10         return "viral";
11     }
12 }
```

Console logs show the application starting successfully on port 8080:

```
2018-09-21 21:46:14.623 INFO 13696 --- [ost-startStop-1] o.s.b.w.s.ServletFilterRegistrationBean

```

- b. Coba akses localhost:8080/viral, berikan alasan dan jelaskan apa yang terjadi.

Terjadi error pada halaman tersebut.

Whitelabel Error Page

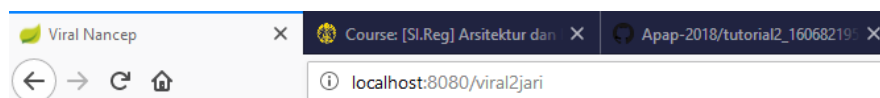

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Sep 21 21:46:35 ICT 2018

There was an unexpected error (type=Not Found, status=404).

No message available

Alasannya karena request mapping dipindahkan dari url yang sebelumnya /viral menjadi /viral2jari.

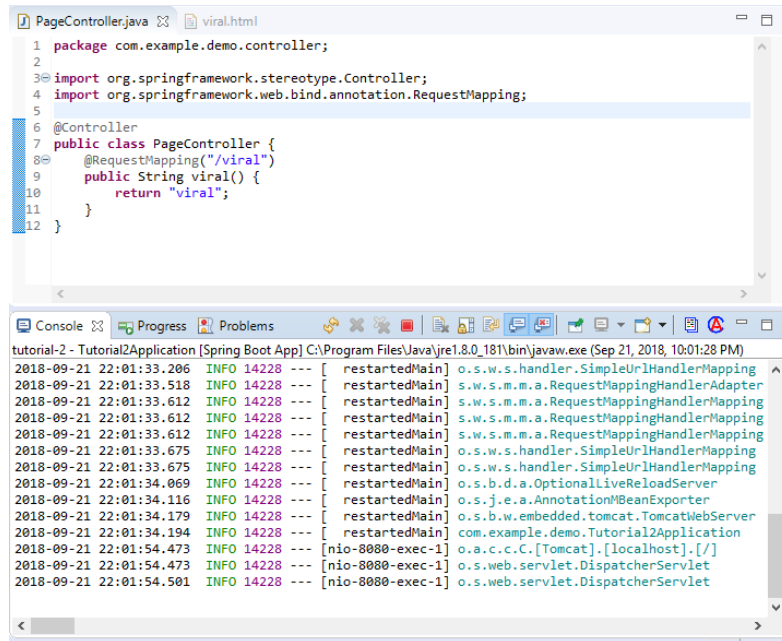

Mashook Pak Ekoo!!

c. Apakah kegunaan @RequestMapping("/viral")

Tujuannya untuk memetakan request ke url /viral.

2. a. Apakah terjadi compile error? Tidak terjadi compile error.

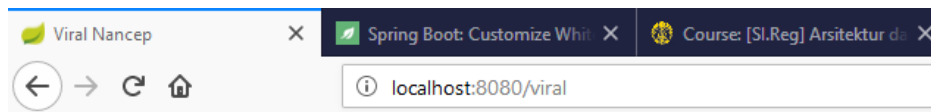

```
1 package com.example.demo.controller;
2
3 import org.springframework.stereotype.Controller;
4 import org.springframework.web.bind.annotation.RequestMapping;
5
6 @Controller
7 public class PageController {
8     @RequestMapping("/viral")
9     public String viral() {
10         return "viral";
11     }
12 }
```

Console logs:

```
2018-09-21 22:01:33.206 INFO 14228 --- [ restartedMain] o.s.w.s.handler.SimpleUrlHandlerMapping

2018-09-21 22:01:54.501 INFO 14228 --- [nio-8080-exec-1] o.s.web.servlet.DispatcherServlet
```

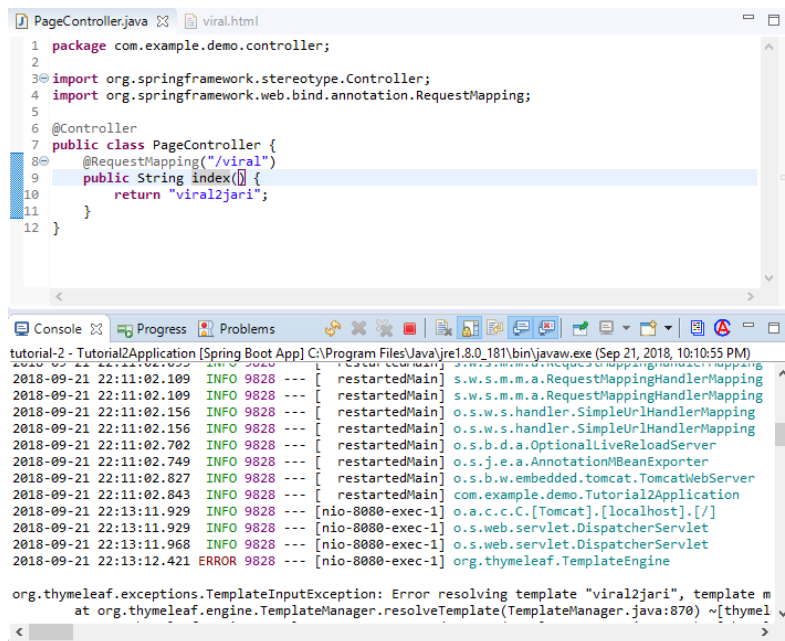

b. Coba akses localhost:8080/viral, berikan alasan dan jelaskan apa yang terjadi.

Mashook Pak Ekoo!!

Halaman tersebut masih bisa dibuka karena yang diubah hanya nama methodnya.

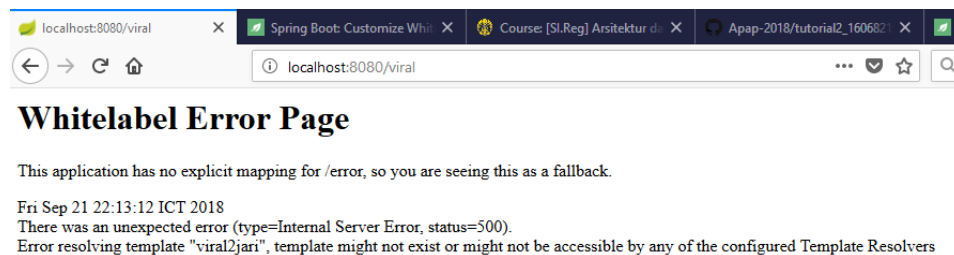

3. a. Apakah terjadi compile error? **Terjadi compile error.**

```
PageController.java  viral.html
1 package com.example.demo.controller;
2
3 import org.springframework.stereotype.Controller;
4 import org.springframework.web.bind.annotation.RequestMapping;
5
6 @Controller
7 public class PageController {
8     @RequestMapping("/viral")
9     public String index() {
10         return "viral2jari";
11     }
12 }
```

```
tutorial-2 - Tutorial2Application [Spring Boot App] C:\Program Files\Java\jdk-8.0.181\bin\javaw.exe (Sep 21, 2018, 10:10:55 PM)

2018-09-21 22:13:12.421 ERROR 9828 --- [nio-8080-exec-1] org.thymeleaf.TemplateEngine
org.thymeleaf.exceptions.TemplateInputException: Error resolving template "viral2jari", template not found
at org.thymeleaf.engine.TemplateManager.resolveTemplate(TemplateManager.java:870) ~[thymeleaf-3.0.11.jar:3.0.11]
```

- b. Coba akses localhost:8080/viral, berikan alasan dan jelaskan apa yang terjadi.

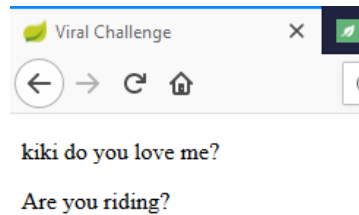

Return berfungsi untuk memanggil file html, namun karena file viral2jari.html tidak ada, terjadi compile error dan halaman localhost:8080/viral tidak berisi apa-apa.

- c. Apakah kegunaan return type pada method controller tersebut? **Untuk melakukan render pada file html sesuai yang tertulis.**

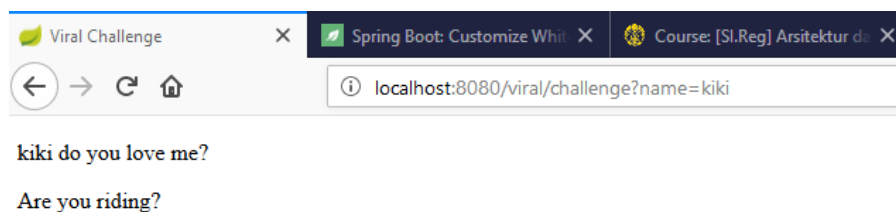

Latihan Request Parameter

1. Mengapa tulisan “In My feeling” pada thymeleaf challenge tidak pernah muncul di browser?

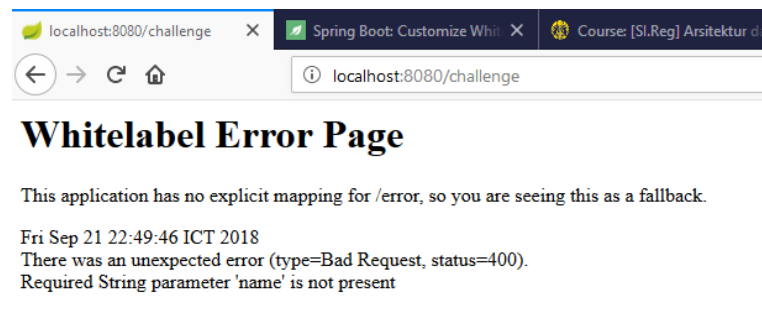

Karena yang keluar hanya yang ada di th:text=type.

2. Ubah nilai anotasi Request Mapping “/challenge” menjadi “/viral/challenge”. Deskripsikan hasil pada browser dan kembalikan ke bentuk sebelumnya!

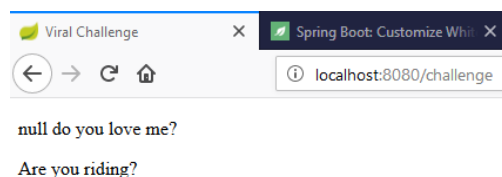

Url yang sebelumnya /viral berubah menjadi /viral/challenge. Url yang selumnya tidak berisi apa-apa.

3. Akses localhost:8080/challenge.
 - a. Deskripsikan hasilnya.

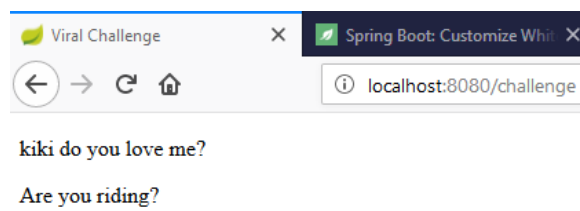

Terjadi error pada halaman tersebut.

- b. Ubah methodnya menjadi seperti di soal, deskripsikan lalu kembalikan ke bentuk awal!

Value dari name bernilai null, tidak terjadi error karena valuenya tidak wajib diisi (required = false).

- c. Ubah methodnya menjadi seperti di soal, deskripsikan lalu kembalikan ke bentuk awal!

Value dari name diset default menjadi “kiki”, sehingga name apabila tidak didefinisikan akan keluar “kiki” bukan null dan tidak terjadi error.
